

# Quickbooks WebConnector

proof-of-concept

How to

# 1. Description

This is a simple web application which provides web service for interact with Quickbooks WebConnector (QBWC). This application allow to create Vendors in the QuickBooks Desktop.

More info:

## 1. About QBWC

[https://developer.intuit.com/docs/0250\\_qb/0010\\_get\\_oriented/0080\\_quickbooks\\_web\\_connector](https://developer.intuit.com/docs/0250_qb/0010_get_oriented/0080_quickbooks_web_connector)

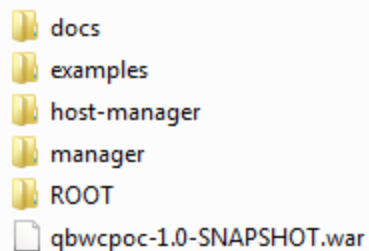

## 2. QBWC Programmer Guide

[https://developer-static.intuit.com/qbSDK-current/doc/PDF/QBWC\\_proguide.pdf](https://developer-static.intuit.com/qbSDK-current/doc/PDF/QBWC_proguide.pdf)

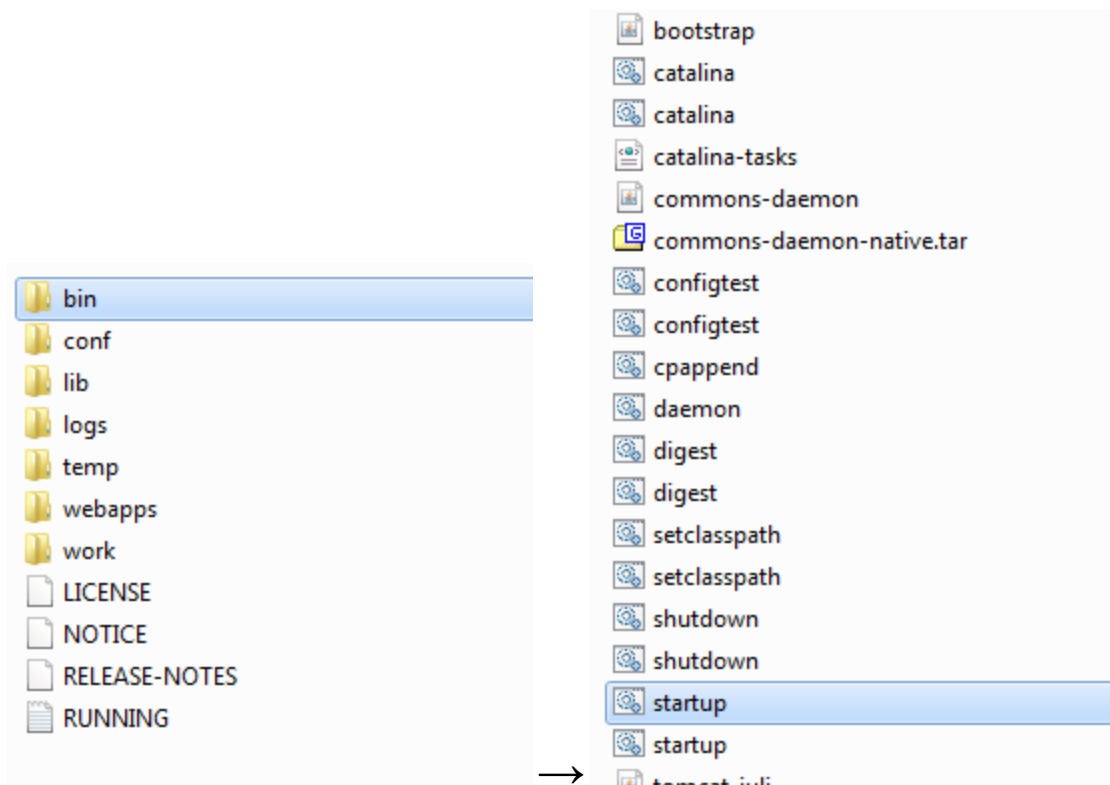

# 2. How to try it out

2.1 Get Apache Tomcat 7.0 <http://tomcat.apache.org/download-70.cgi>

2.2 Copy PoC web app file: qbwcpoc-1.0-SNAPSHOT.war to the webapps folder under tomcat root folder:

2.3 Start Tomcat. For that run file startup.bat (or other appropriate for your OS executable file) from bin folder under tomcat:

## 2.4 Installing QBWC

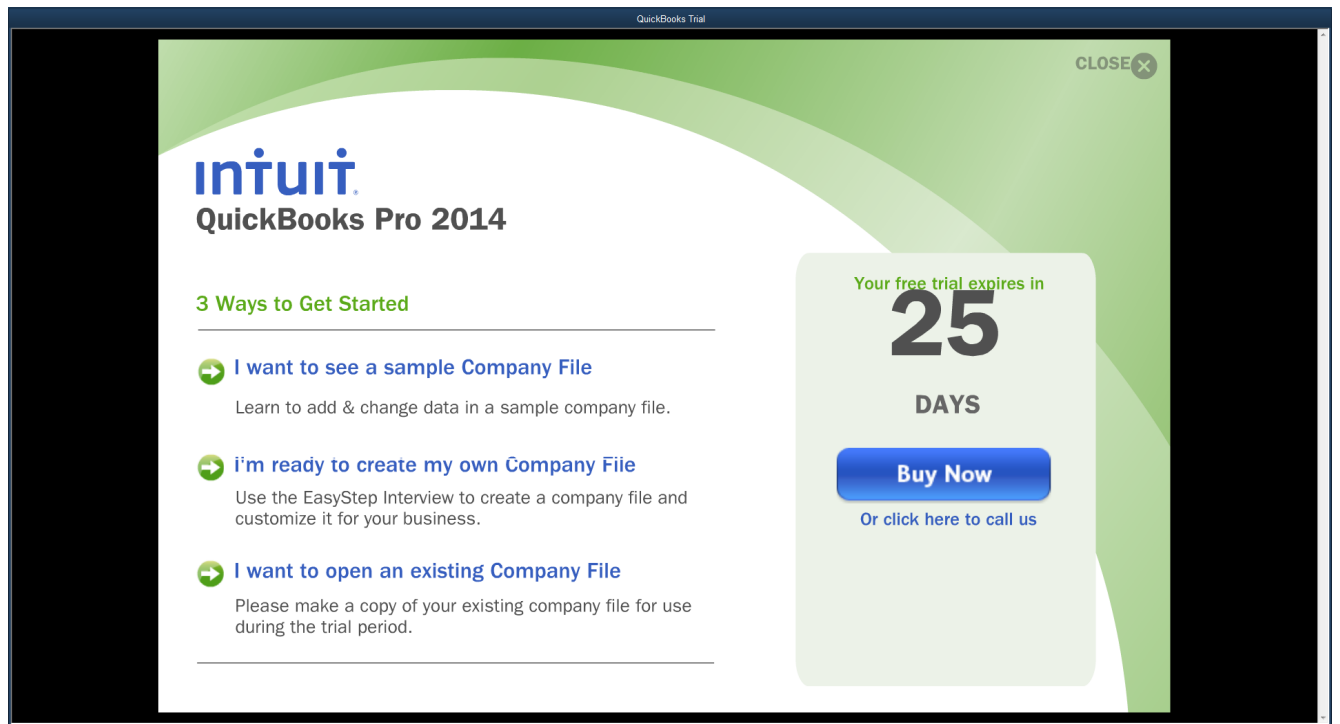

Download QBWC from this link: <http://marketplace.intuit.com/webconnector/>

Select for download version Version 2.1.0.30

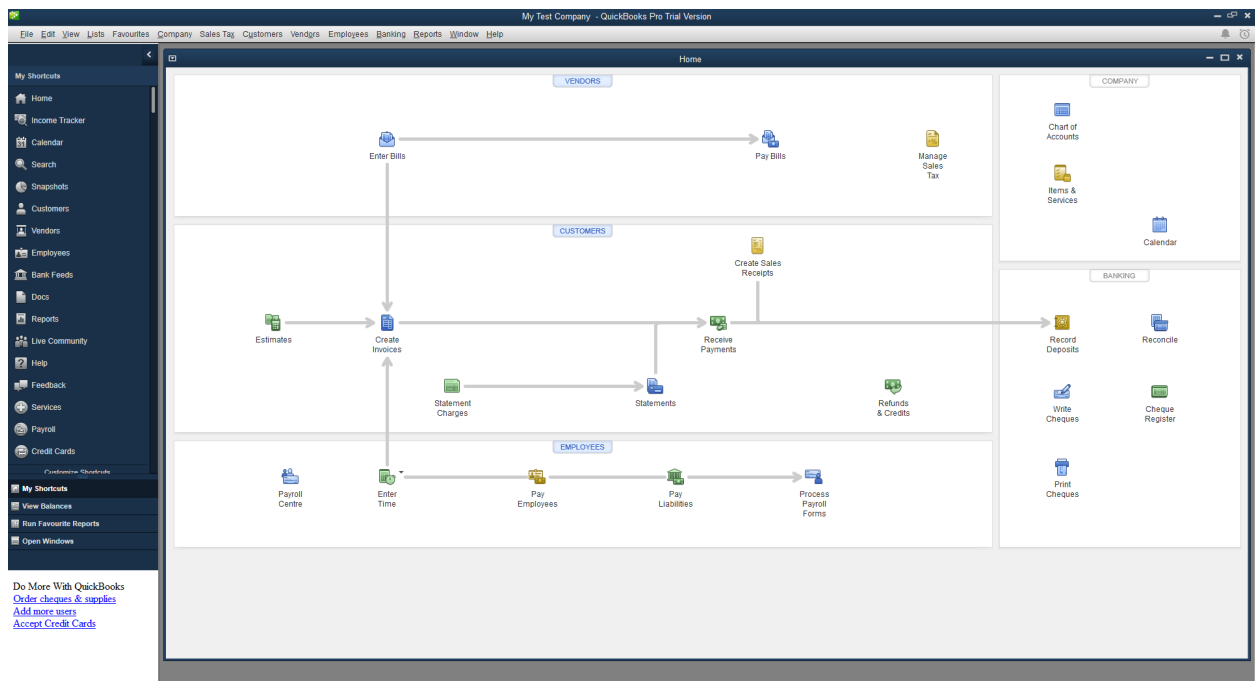

([http://developer-static.intuit.com/idn/downloads/QBSM/Webconnector/QBWebConnectorInstaller\\_2\\_1\\_0\\_30.exe](http://developer-static.intuit.com/idn/downloads/QBSM/Webconnector/QBWebConnectorInstaller_2_1_0_30.exe))

Then install it.

2.5 Start Quickbooks Desktop. Open in it some company for testing.

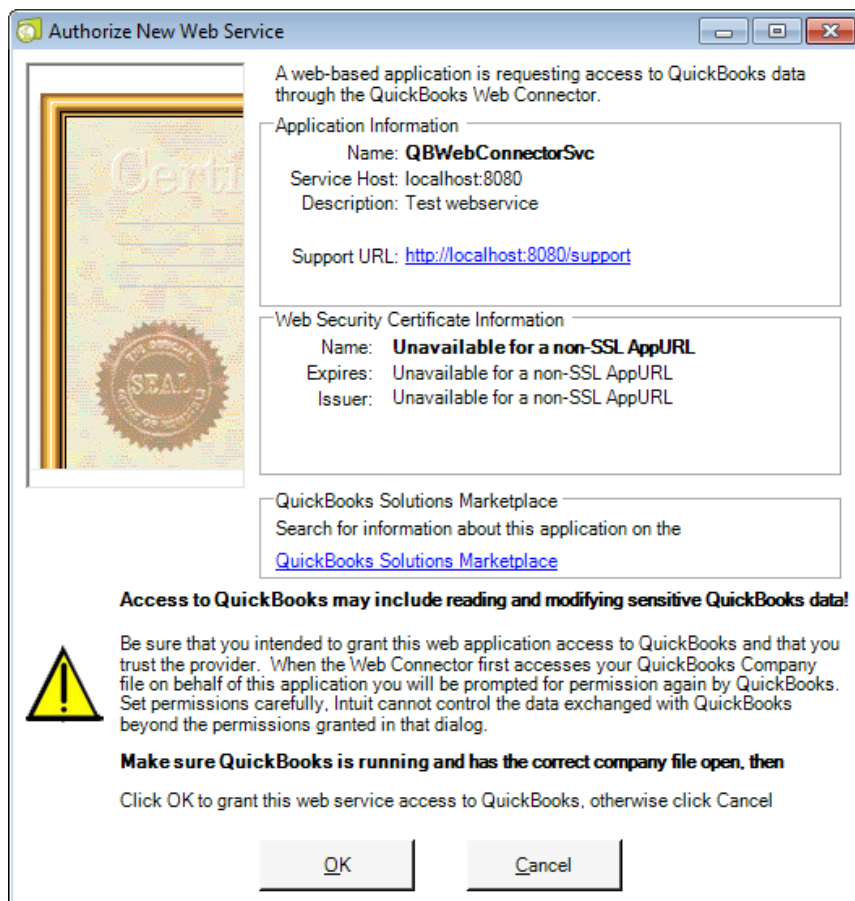

E.g: Use 'I want to open an existing Company File' or create a new Company File.

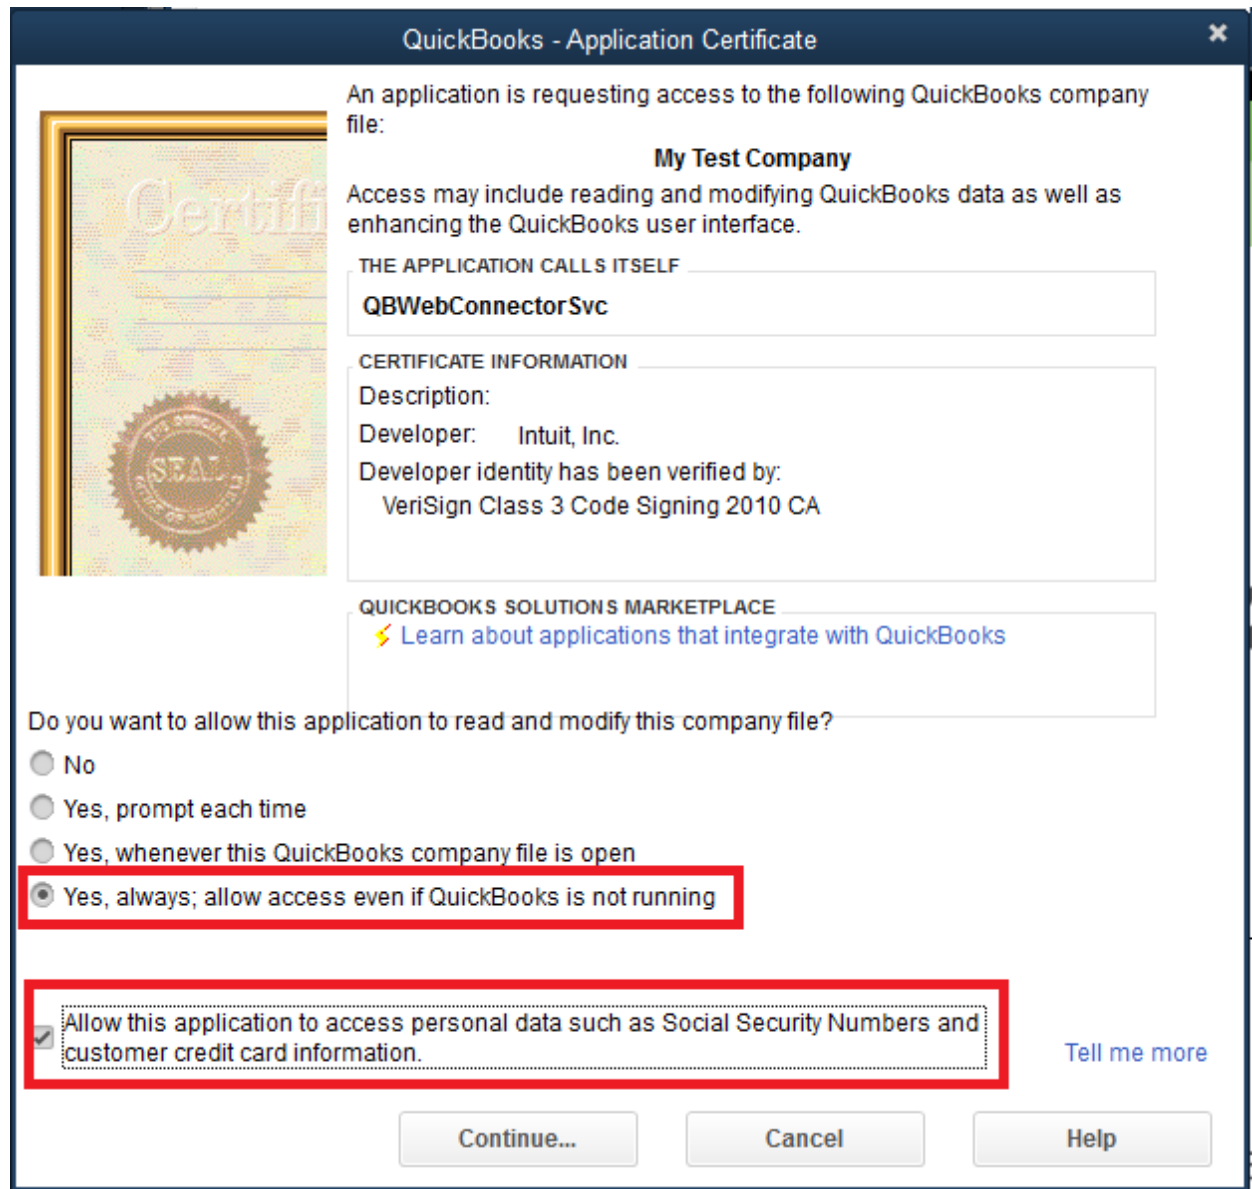

## 2.6 Start QBWC - Web Connector:

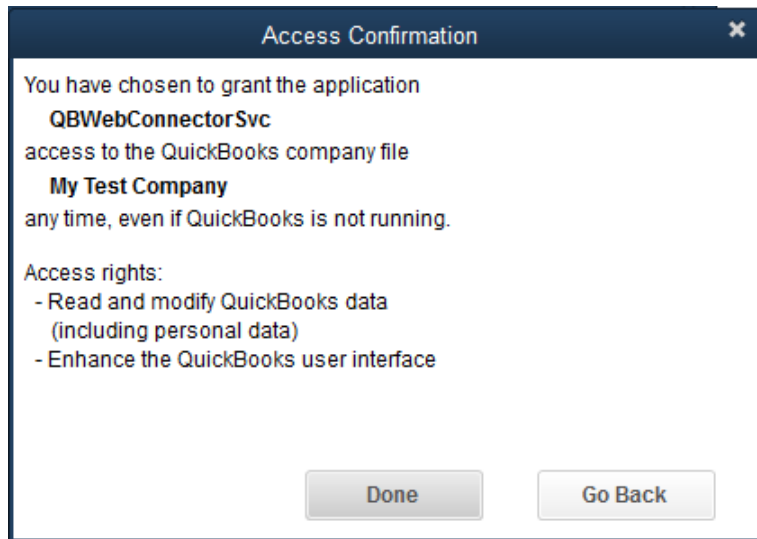

2.7 Add PoC web app to Web Connector. For that click at **Add an Application** and then select file **qbwc-poc.qwc**. Then will be showed confirm dialog for add application to web connector:

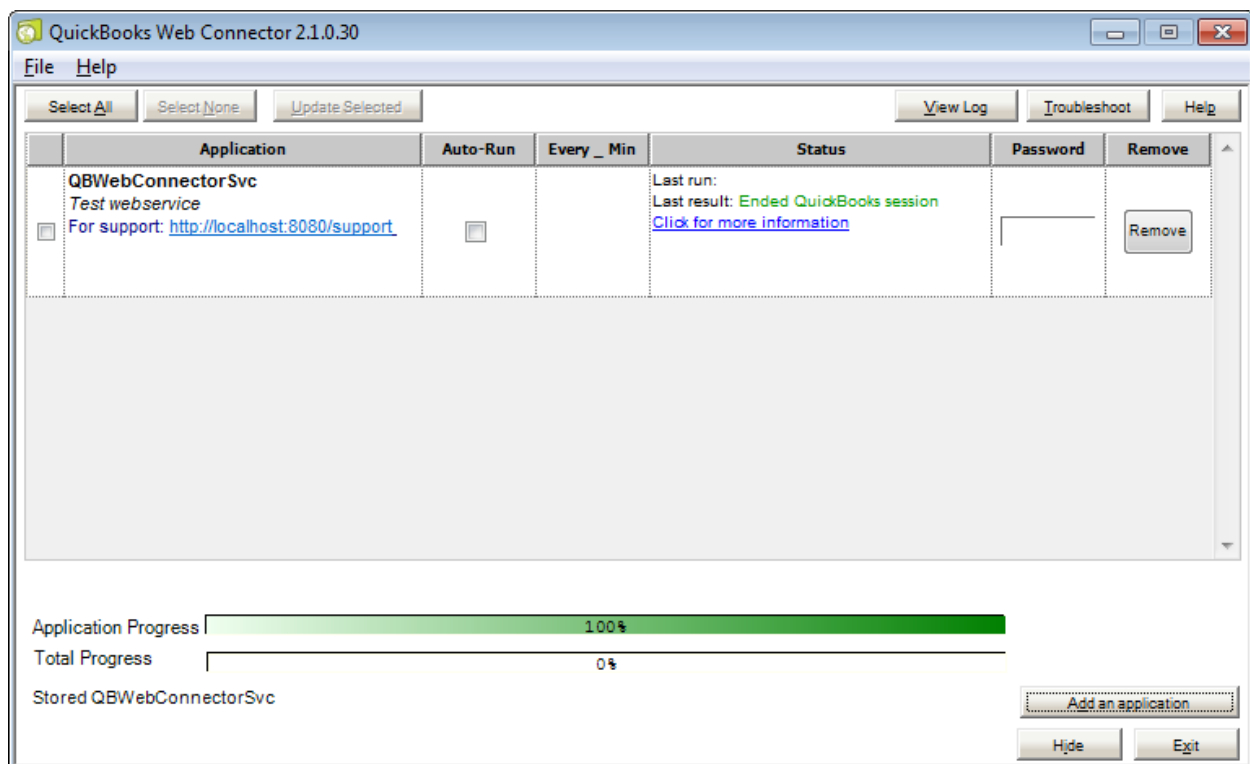

Click at **Ok** button. After that Quickbooks will ask for select permissions.

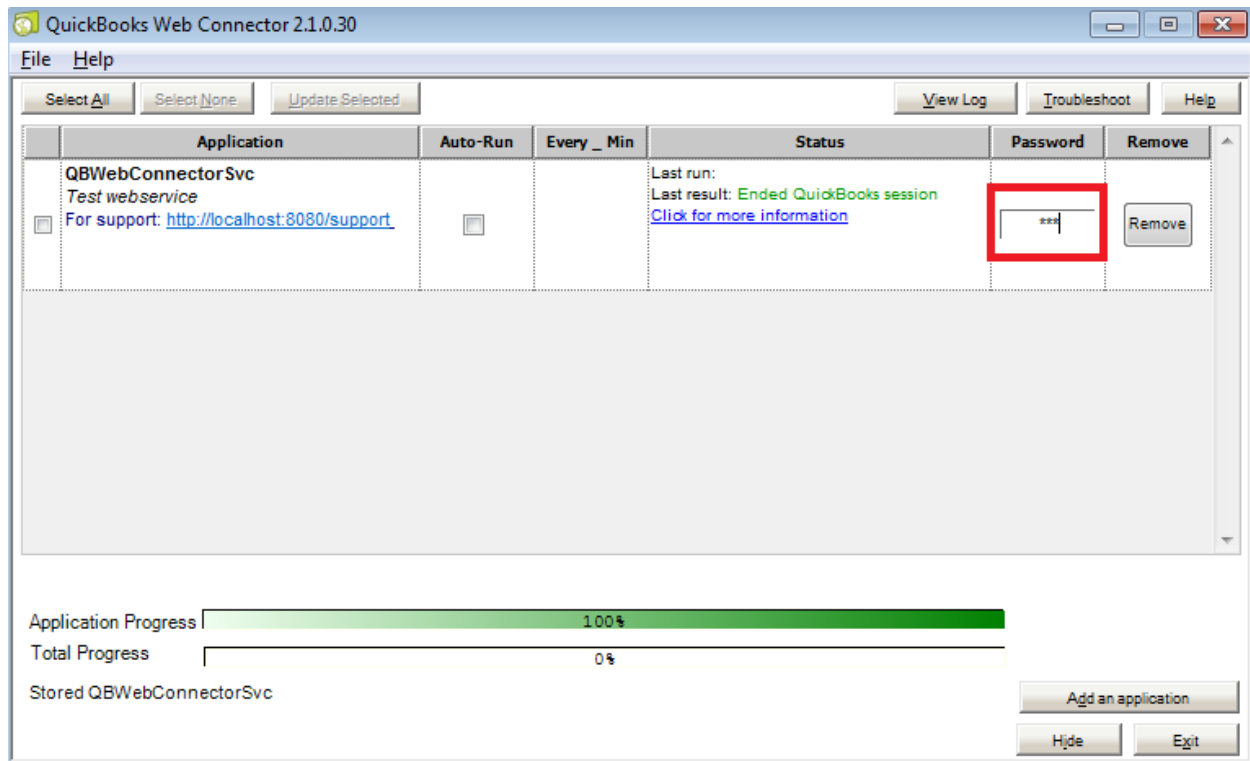

Let's allow always get access from our PoC application. Then click at **Continue...** button. Will be showed confirm dialog with list of permissions. Review them and click at **Done**.

After that we will have PoC application added to QBWC:

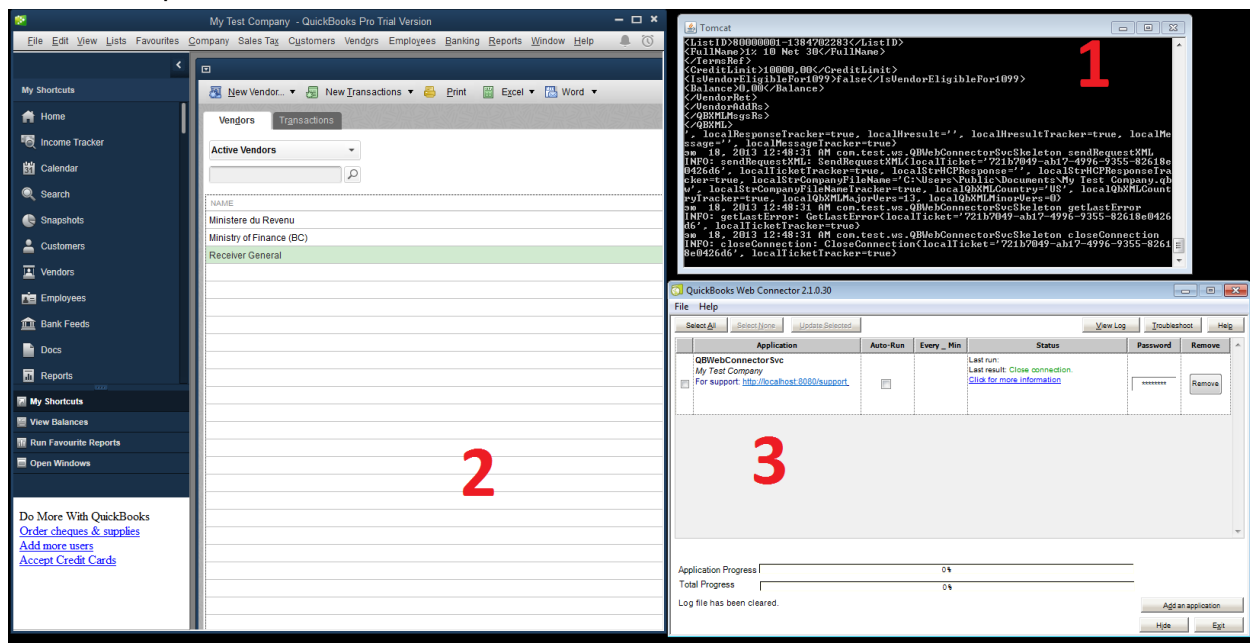

2.9 In the password field enter password: **123** and press **ENTER**.

Will be showed dialog with confirmation about saving password. Click at **Yes** for save password.

2.10 At this point we will have next items:

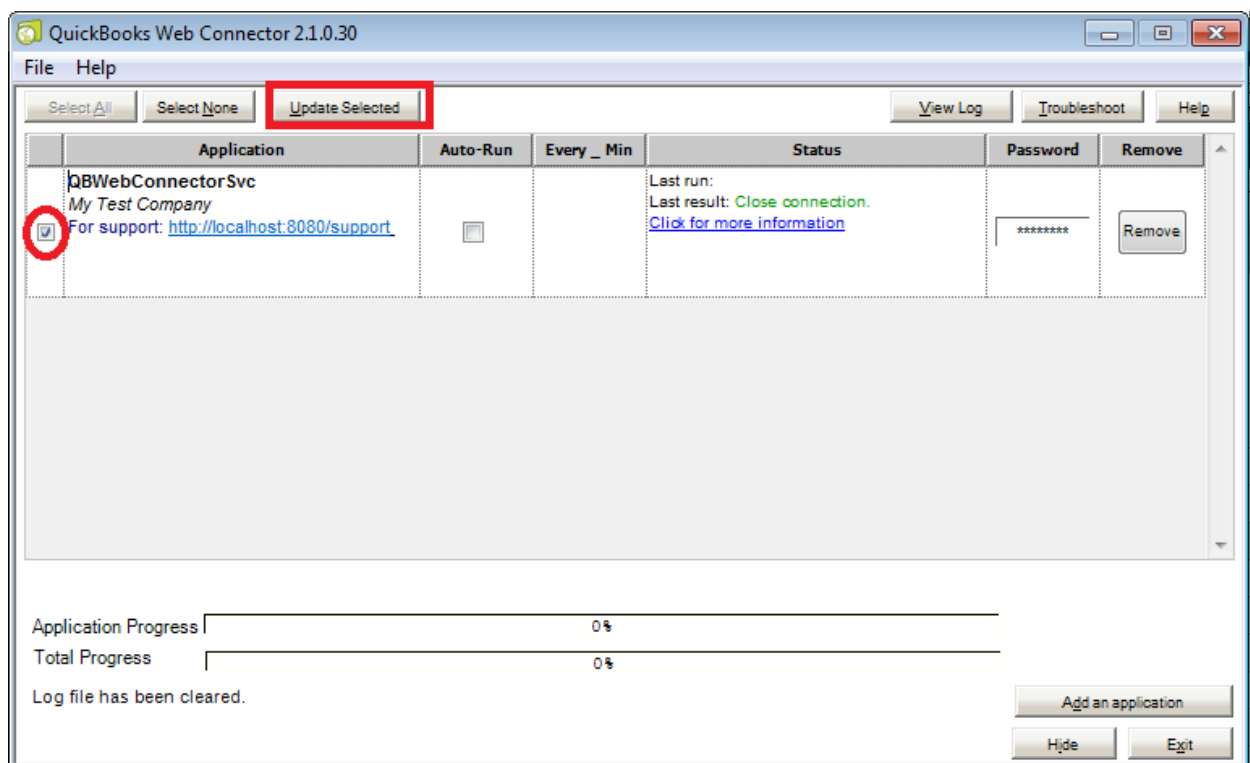

1. Running PoC application on Tomcat. You can get WSDL from our webservice by follow this link (and be sure in correct work of webservice):

<http://localhost:8080/qbwcpoc-1.0-SNAPSHOT/services/QBWebConnectorSvc?wsdl>

2. Running Quickbooks Desktop with opened company file.

3. Running Quickbooks WebConnector

2.11 For start interaction QBWC with PoC application web service, and as result create Vendors - in the Quickbooks need to select our application in QuickBooks Web Connector window and click at **Update Selected** button:

2.12 Quickbooks Web connector will start interaction with our PoC application. Then In the Quickbooks you can open list of Vendors and see just created **Vendor**:
